COUNCIL HAS DECIDED TO HOLD TAX SALE

Preparations are Being Made Now --- The Whole Family May Now Vote on Property of Father.

The regular meeting of the town council was held in the council chamber last Monday evening, Mayor Bott occupied the chair and the full council was present.

After the disposal of the minutes of the previous meeting a letter was read from H. Von Conhoughnet asking permission to purchase lots 31 and 32, in block 94, at the upset price. These lots were up for sale at the last tax sale but reverted to the town. The secretary was instructed to write the Minister of Municipalities asking for his approval and if same were granted that the lots be sold to Mr. Van Conhoughnet.

The secretary read a letter from the Deputy Minister of Municipalities drawing the attention of the council to an amendment to Section 79 of the Town Act. This act provides that a wife and all children of voting age may vote in municipal affairs on any property of which the husband or father is the registered owner.

Secretary Courtnell wrote the council asking for an increase in salary. The matter was referred to a committee of the whole council.

The secretary of the Utilities Commission wrote the council stating that the Commission could not see its way clear to approve the $30,000.00 water debenture by-law. The reason given by the Commission for their actions in the matter was the large amount of overdue taxes now on the town books.

This brought up the question of a tax sale and Councillor Lydiatt impressed upon the council the importance of holding one as soon as possible. After some discussion it was moved by Councillor Lavelle, seconded by Councillor Oates, that the matter of a tax sale be referred to the finance committee with power to act and instructions to hurry the sale along as quickly as possible.

On motion of Councillors Howard and Lydiatt the Mayor and Secretary were authrized to make arrangements with the Royal bank for a loan of $10,000.00.

Some time ago the engineer at the pumping station asked for better living accommodation at the plant and this week the Brick & Coal Co. offered to sell one of their houses in the south end to the town for this purpose. Councillors Broughton, McLean and Oates were appointed a committee to look into the proposition and report at next meeting.

As it was intimated that the debris on Mrs. Lynch's proprty on Broadway was interfering with contemplated work on other buildings in the neighborhood, it was mover by Councillor Lavelle, seconded by Councillor Oates, that the secretary notify Mrs. Lynch that unless this debris were disposed of in compliance with the bylaw within 30 days, the secretary steps be taken to compel her to do so.

The question of who employs the health inspector was introduced and after some discussion it was the opinion of the council that this official was employed by the Board of Health and was responsible to them for the work in this department of the town's work. He is, however, responsible to the council for the work in connection with the pound.

Some complaints were made to the council about the growing habit of using the sidewalks by bicycle riders. In the discussion it was brought out that this habit was a serious inconvenience to pedestrains and some narrow escapes from accidents were reported. It was decided that in future any cyclists caught riding on the sidewalk would be prosecuted.

There being no further business the council adourned.

After the regular council meeting the council met as a committee of the whole and after some discussion decided to raise the town clerk's salary $25.00 a month. The town engineer was also given a raise of 10.00 a

Red Cross Tea and Shower May 23rd

Preparations are now well under way for the Red Cross tea and shower to be held in the Redcliff club rooms on Wednesday afternoon the 23rd inst.

This affair is gotten up for the purpose of securing funds and provisions to be sent to the Military Hospital at Ogden and it is hoped it will be well patronized by the people of the town and surrounding country.

During the afternoon, from 3.30 to 6 ice cream and cake will be served and those who can are asked to bring with them something in the eatable line which they think would be enjoyed by the returned soldiers who are now in this hospital. Among the articles suggested for the shower are: Money, preserved fruit, groceries, fruit cake, cookies, oranges, and marmalade.

As these will be boxed and forwarded to the hospital, perishable goods are not desirable.

Owing to the number of soldiers who are now returning to Alberta for medical treatment this hospital is kept well filled and the need for an increased supply of the delicacies above mentioned is continually growing.

Redcliff has two returned soldiers in this hospital. Let our shipment be such as will make them feel proud of their home town.

Redcliff Turned Down By Hat Baseballers

A meeting was held in Medicine Hat last Friday evening to arrange a baseball league for this season. Representatives from Redcliff were asked to be present on the understanding this town would be invited to join the Hat city league as in former years. The meeting was not far advanced, however, when the Redcliff delegation found out they were not wanted in the league. The Medicine Hat sports 7 expressed themselves as willing to take Redcliff into the league if they would play all the games in Medicine Hat. As this idea savored too much of the "whole hog or none" the Redcliff delegation could not accept the proposition. Consequently the league was formed and Redcliff was left out.

Italians Are Again Doing Good Work

After prolonged inactivity the Italians appear to be coming back strong. They are now engaged in a strong offensive against the Austrians along the Isonzo front, and have succeeded in capturing several vantage points, including the village of Seagora and Zagomila, ad carrying with great dash two mountain crests. The Austrians, apparently taken by surprise in the commencement of the offensive, are now striving with their artillery and infantry to hold the Italians in check, but thus far, according to the Rome war offic, they have met with no success.

Prisoners to the number of 3,350, among them 98 officers, and guns, machine guns and war material have been captured by the Italians.

Embargo on Canadian Cattle May be Lifted

The removal of the embargo on Canadian cattle going into the British Isles, it is predicted will be one of the announcements that Sir Robert Borden will make as the result of the imperial conference. Hitherto all Canadian cattle sent to England have had to be slaughtered on landing and Canadian governments have tried for many years to get this restriction removed.

Sir Robert was asked if he had anything to say regarding the rumor but he replied that he could make no statement at present.

Huns Lost 200,000 Men in Two Weeks

Germany lost 200,000 men in killed, wounded and captured in the period from April 16 to May 1 on the French front alone. In the two weeks since May 1 it is estimated her additional losses have been proportionately greater even than this staggering mortality. The figures on which this estimate is based are those of headquarters,

HON. A. L. SIFTON

Premier of Alberta, who is again appealing to the country in a general election on June 7th.

UNITED STATES DESTROYERS IN BRITISH WATER

The British Admiralty yesterday announced the arrival of number of American destroyers in British waters. The following announcement was given out: "The British Admiralty states that a flotilla of United States destroyers recently arrived in this country to co-operate with our naval forces in the prosecution of the war."

Farmers Can Defeat Kaiser Says U.S. Man

No such responsibility has ever rested on any class of men since the world began as rests today on the farmers of America, according to Gifford Pinchot, former United States chief forester.

In a letter to a Minnesota newspaper Mr. Pinchot declares that the safety of the United States against foreign invasion hangs on the decision of the farmers of the 48 states.

"The two great weapons in this war are arms and starvation," wrote Mr. Pinchot. "The war against Germar arms will be won or lost in France the war against starvation will be won or lost in America.

"The kaiser cannot whip the French and English armies and the English navy while England has food, but it is still possible that the German submarines may be able to keep food enough from reaching England to starve her into submission.

Says Flour May Reach $20 a Barrel

Herbert C. Hoover, who recently returned from Europe to advise the government on European food conditions, says that without control we may see flour at $20 a barrel before the year is over, but that with control "the present price of flour can be reduced 40 or 50 per cent and at the same time the producer be treated in a liberal manner."

"There is absolutely no occasion for food panic, nor any justification for outrageous prices unless the opposition of special interests defeats the president in obtaining necessary power to control fully the nation's food," he said.

St. Ambrose W.A. Have Successful Day

The sale of work and dance given in Reid's hall last Thursday evening by the W. A. of St. Ambrose church was a great success. The sale of work was held in the afternoon. The hall was artistically and conveniently arranged for the occasion, and as many useful and dainty articles were offered for sale the ladies experienced little difficulty in disposing of the these goods. Refreshments were also served during the afternoon. In the evening the dance attracted a fairly large crowd and as the music and other necessities were all that could be desired a most enjoyable evening was spent. The ladies expect to clear about $80.00 as a result of their efforts.

Billion Dollar Fleet For United States

Leaders of both parties in congress at a conference with President Wilson last Friday promised to support the administration' billion dollar ship building program. Bills will be introduced immediately to give the shipping board $500,000,000 for construction of a great steel and wooden cargo fleet to run the German sea blockade and the remainder of the maney will be appropriated whenever needed.

Great Stampede.

What will probably be the last exhibition of its kind in Canada will take place July 10;11-1-13 at Medicine Hat when the most stupendous stampede ever pulled off in Canada will take place. In addition to the facts that are found in an advertisement in another column, we are informed that already arrangements have been made to have the best and "worst" horses in America and the best riders in the world at this stampede. Such "bad" horses as Ray, Gray Eagle, White Man, Scar Head, Moose Jaw, Old Tornado, will be be ridden by such famous riders as Emery La Grande, the world's champion; A. J. Bryson, Canada's best all-round cowboy; Rufus Reland, the best bareback rider in the States; Ed Lindsay, the champion bulldogger of the States, and many others, both men and women.

In addition to the Stampede proper, there will be an agricultural and stock exhibition, a race meet and a baseball tournament for the championship of western Canada.

Football Game Next Thursday Afternoon

Donald McLachlan has completed arrangements for a big football game in town on the afternoon of Thursday, May 24th. As soon as it was known that he was arranging for this game old players from all parts of the town volunteered their services until now we feel safe in predicting that this game will be one of the best seen in Redcliff for some time.

The game will be between the Rolling Mills staff and the employes from the other industries in town, and will be played on the old football grounds on Main street south. The ball will be faced off at 2.30.

As Thursday is a legal holiday, and as all the proceeds from the game go to the Red Cross society there should be a good turnout. Suits and footballs have been arranged for by Mr. McLachlan, who is footing all the expense in connection with the game, and he desirous of having all those who are going to play in the game turn out for to practice.

Since the footboys are going to so much trouble it would be a good idea if the baseball club would try to get up a game between two teams in town and have it run off either after the football match or in the evening. Let us make a day of this, the first summer holiday.

Brick & Coal Plant Increasing Output

For the first time since 1914 the Brick & Coal Company here is now running all brick machines in the brick plant, although the plant has been in operation for some time the demand has not been brick enough to require it to run full capacity until recently. During the past few weeks, however, the outside orders have been increasing, necessitating a speeding up to keep pace with them.

These orders are coming mostly from the smaller towns throughout the three prairie provinces, and judging from the enquiries coming from the larger centre there is a busy season in store for this plant.

Russian Politics Cause Anxiety

The Russian situation continues to present one of the most interesting and important aspects of the great war problem. So far that Russia might make a separate peace and that all opposition to the Germans on the east front might be withdrawn appears to have subsided to a considerable extent. The Petrograd correspondent of the New York Evening Post declares that "while there is a wide-spread desire for general peace, it cannot be stated too emphatically that every sane Russian, even the anarchist, is against a separate peace." Other advices indicate a disposition on the part of all influential elements to resist German advances whether made through the army on the front or through German agents in the capital.

here is still, however, well founded anxiety as to the trend of Russia's internal politics—the ultimate form of her government, just now Russia appears to be possessed of a sort of dual government.

Thinks Two Nations Will Foil Submarines

THINKS TWO NATIONS

Confidence that the submarine menace will be met either by British and American inventive genius or by the combined navies of the two powers, was expressed by Rear Admiral Sir Dudley R. S. De Chair, of the British mission at a reception tendered him by the American Navy League. British invention, he said, "encouraged me to express the confident hope that the necessary antidote to the submarines will be found."

Admiral De Chair said American and British naval officers would be content to let things rest with the merchant shipbuilding program as a mean to crush the submarine.

Forty carloads of the 828,000 bushels of wheat held in storage in Minneapolis for the Allies were loaded this week for shipment to Duluth. As fast as the rest can be loaded it will be shipped over the Great Northern to Duluth, where boats are waiting to carry it down the Great Lakes for export.

PROVINCIAL ELECTION SET FOR JUNE 8th

Nominations to be Held on on May 31st---No Election in Redcliff Constituency This Time.

Writs were issued last Monday for elections in Alberta, the election to be held in all the constituencies, except two, on June 7, the nominations being one week earlier, or May 31. There will be two deferred elections, Athabasca and Peace River, the writs for which have been issued and the date will be fixed by the returning officers.

John A. Reid, Alberta agent in London, has been appointed returning officer for the two seats at large, which will be open for soldiers serving overseas.

John D. Hunt is also appointed returning officer to take the vote at camps in the province of Alberta, the votes being deposited in the riding in which the soldier resides, upon which list his name will be placed.

In 11 of the 58 constituencies there will be no elections, the soldiers representing these seats being declared reelected by an act passed at the last session. Twelve constituencies were included in the list named in the act, but Lieut. Stauffer was killed in action, subsequently an election will be held in the Didsbury riding.

There will be no election in Redcliff constituency as this is one of the 11 at present represented by a one time soldier.

British Still Gain On Western Front

After days of intensive fighting, in which positions have changed hands numerous times, the British troops have recaptured the greater portion of the village of Bullecourt and repulsed violent counter-attacks delivered by the Germans east of the village.

Along the Scarpe river to the east of Arras there also have been sanguinary encounters, but again the advantage rested with Feild Marshal Haig's forces. Portions of the village of Roeux have been taken by the British and another step forward has been gained by them on the western slopes of Greenland Hill.

Storming the German lines east of Arras along a 12-mile front, British troops forced back the Germans at two important points, and established themselves in Bullecourt, the scene of many desperate struggles recently. Heavy losses were inflicted on the Germans, and more than 700 prisoners were taken.

Without giving the armies of the Crown Prince Rupprecht time to recover after the repulse of their ineffectual counter-attacks, Field Marshal Haig threw his forces against three vital points in the line protecting Douai, and in each place gained his objective. At the southern end of the line was Bullecourt, protecting Queant. There thousands have fallen in attacks and counter-attacks in the last two weeks. The battle here lasted for many hours, during which the British firmly protected themselves in the village, but the fighting still goes on.

Six miles to the north along the Arras-Cambrai road and between the villages of Monchy and Guemappe, the British straightened out their line by taking 1,200 yards of a German trench system. Cavalry farm, a strong point in the German defenses here, also fell into British hands.

Huns Take 600,000 From East Front

Germany has withdrawn forty divisions, approximately 600,000 men, from the Russian east front and hurried them to France to oppose the Franco-British offensive, according to information from Russian headquarters.

Thousands of women in all parts of the United States are preparing to replace men called to the colors. Statistics compiled showed a rush of preparation for this big move in practically every city.

Issued on Thursday of each week at Redcliff, Alberta.

THURSDAY, MAY 17, 1917.

A POOR LAW.

A new law which was brought to the attention of the council last Monday evening, in a letter from the Minister of Municipalities, is to the effect that in future the wife and all sons and daughters of a man owning property may vote on that property. That is providing they are all of voting age.

This may be some inducement for married people to have big families in order to increase their voting power but so far as an equitable legislative inactment, it is, in the opinion of the Review, away wide of the mark. If property qualification is to be the guage, why should a $200 piece of property owned by a man with a wife and four sons, represent six votes, while an adjoining property valued at $1.000 and owned by a man with only a wife, should only represent two votes? Or, since women now have equal franchise with men in provincial affairs, why should not a woman's property entitle the husband and children to vote also? Or again, why should not the son's property entitle the father and mother to vote. Why not make it a joint stock affair all round?

It seems to us it would have been much closer to an equitable disposition of the question if the legislature had passed an act making it possible for towns, if they so desired, to allow tenants to vote. A tennant is in reality a tax payer, but the son or daughter of a property owner is not necessarily a rate payer by any stretch of the imagination. And more than that a tennant, who is usually a man of a family, is more interested in town and school affairs, than is the boy or girl of voting age who is living with the old folk.

SERIOUS HANDICAP.

The reason given by the Utilities Commission for not allowing the town to proceed with its water extension program, is one which furnishes food for thought. The reason was that the town had too large an amount of unpaid taxes now on its books.

It will be seen by this that the delinquent tax payer is a serious handicap to the development of the town. We know there are cases when it is impossible to keep taxes all paid up to date but it very often happens that the ones who make no special effort in this direction are the ones to do most complaining about conditions. Here is a concrete example of how they are standing in their own light. If all the back taxes were paid up there would not be a town in the province in a better financial condition. We would then be in a position to proceed with developments which are necessary for further industrial expansion and further industrial expansion means a growing and prosperous town, advantageous alike to business man and property owner.

Just while on the question of taxes we might remind delinquents that the council is now completing arrangements for holding a tax sale in the near future. Better look up your tax notice and see how you stand.

ALL GET OFF.

Henceforth anyone caught riding a bicycle on the sidewalks will be given the opprtunity of appearing before the town provost and of contributing a few plunks to the town exchequer. There is no excuse for riding wheels on the sidewalks now, as the roads are in good condition. It is a question if it should ever be allowed again—even in muddy weather—since there are those who are so careless and abuse the privilege. It is a case like the man who allowed the flies to have a good time crawling around on his bald head but when a wasp came along and stung him he said: "Now just for that you'll all get off."

WHY NOT A CELEBRATION?

What's the matter with Redcliff having some kind of a celebration this year? All towns have their annual sports day and we have had none for several years.

Dominion Day this year is deserving of special attention as it marks the semi-contenial of confederation. No special notice was taken here of the entry of the United States into the war on the side of the Allies. American's big day is Jul 4th. Ours is July 1st. Why not all join together and have a conbined celebration on July 2nd?

Of course penning and printing these few lines is not all that is necessary to have a celebration. Concerted effort, planning and work are necessary. If the suggestion meets with YOUR approval get behind it and push it along.

STOCK AT LARGE.

Now that garden operations are in full swing and many gardens are already planted, it is absolutely necessary that those owning hens, cows and horses take extra precaution to see that they do not become a nuisance to garden owners.

This matter is more important this year than ever before as a number of unfenced lots are being used for gardens. A good garden this year will be worthworth some money. A stray cow or horse can put a whole garden out of business in one night and as the bylaw allows for the collecting of all damages done to property by stray animals, it can readily be seen the chances one is taking by not making his stock secure.

Green garden patches are very inviting to a stray animal and it could very easily eat its head off at one sitting.

When it comes to rounding up stray horses and cattle the pound-keeper misses his old white charger very much. A bunch got away from him one day this week as they were a little more fleet of foot than he is. It would be a good idea if the town horse were at the disposal of the pound-keeper for this purpose.

OUTLOOK PROMISING.

During the closing days of April and the beginning of May there were signs of uneasiness because of the lateness of the usual spring weather, and its effect upon seeding operations. Now, however, all anxiety has vanished for the time being at least. The good weather came in good time and the farmers took advantage of every minute of it. The result is that wheat seeding is about completed in this district and good progress is being made with other grains.

During the period of uneasiness it was feared that the acreage under cultivaion would fall far short of last year's, but reports coming in from all quarters now indicate that there will be a larger acreage in wheat in this district than ever before.

The cold weather of the past two days may not be just what we have been accustomed to for this season of the year but still it should not be the cause of any unnecessary anxiety at this stage. The wheat is all in and it got a little shower Monday which should give it a good start and put it in a healthy condition to take advantage of the abundance of moisture now in the ground. Although it is a little early to figure on the crop the present outlook is most encouraging when all things are considered.

With the grain seeding operations now well in hand farmers would do well to turn their attention to the garden, the hens, the pigs and the stock. The product from all these sources will not only be a paying proposition but also an absolute necessity for the ultimate success and welfare of the Empire.

A MEAN PRACTICE.

We are informed that there are some good sized boys who have formed the very bad habit of tormenting some Chinamen in town by throwing stones at the doors of their homes. This is not only a bad habit but it displays a mean and contemptible disposition. Our informant tells us the boys are known and if he gets another complaint he will expose them.

As there is a vacancy on the school board now owing to the resignation of Chairman Bryant it has been suggested to us that it would be a good idea to have a woman elected to fill the vacancy. Since women now have their franchise in this province and since a majority of the teachers are females, and furthermore as the women appear to be more interested in the welfare and education of children than men, we consider the suggestion a good one.

There never was a time when egg production and increased egg production was as necessary as at present. The demand was never as good, and prospects indicate that this demand will continue for some time to come. With the scarcity of meat, Canadians are eating more eggs and Great Britain needs all eggs that we can supply. Therefore, as a business proposition, increased production of poultry products should appeal to us more than usual.

The decision of the Medicine Hat baseballers to bar Redcliff from their league, just because they couldn't get their own way and have all the games played there, is characteristic of that city. Baseball games are looked upon as good clean sport but unfortunately we cannot say the same about all baseball enthusiasts.

The women of Redcliff constituency will not have an opportunity of exercising their long looked for franchise yet a while. The provincial legislature has decided to choose and elect our representatives for us and thus have deprived men and women alike of their franchise.

U. S. to Take Over Belgium Relief Work

The American government has assumed the immediate financial burden of Belgian relief by arranging to lend to the French and Belgian governments jointly $75,000,000 to be expended by the American-Belgian commission for food to go to Belgium and northern France. The money will be advanced in 54 monthly installments of $12,500,000, of which $7,500,000 will go to Belgium and $5,000,000 to France.

Under the arrangement the American commission will bear the entire cost of supplies, thus relieving the British and French governments which hitherto have borne about 50 per cent of it. Administration of the relief abroad will be left in the hands of Spanish and Dutch agents of the Belgians and French themselves. The money loaned is part of the $3,000,000,000 Allied fund being raised in the United States.

STATE TO CONTROL LIQUOR.

According to the Daily Express the British government has taken definite steps in the direction o state control of the liquor traffic by deciding to assume charge of breweries. An announcement of state control, the Daily Express adds, possibly will be made this week.

Britain's war expenditure each day at present total $34,560,000.

NOTICE!

In the matter of the Court of Confirmation of the Tax Enforcement Return of the Town of Redcliff.

Take notice that His Honor Judge Greene, Judge of the District Court of the District of Medicine Hat, will at a sitting of the Court on Friday, the 6th day of July, 1917, confirm the Tax Enforcement Return of the Town of Redcliff at 11 o'clock A. M., in the Town Hall, Redcliff.

Dated at Redcliff this 16th day of April, 1917.

F. H. COURTNELL.
Secrtary-Treasurer,
Town of Redcliff, Alberta.

COOKING VEGETABLES WRONG AND RIGHT WAY

Draining Them After Boiling Is Water Would Frighten a French Cook—The Better Way

Worse than meat for breakfast, or throwing stale bread in the garbage can, is the sin of boiling vegetables in quantities of water and cheerfully throwing said water down the kitchen sink. Such a practice, which would be unthought of by French or other foreign cooks, is carried on in our households every day.

If we stop to analyze the composition of vegetables we shall find that all of them are composed of fibrous cellulose, starch grains and mineral salts. The cellulose is just the network to hold, together the starch and salts, which are really held in solution in the vegetable or plant body. Now, with this idea clearly in mind, think of boiling a vegetable in a quantity of water—say, three quarts. The boiling bursts the starch granules as well as cooks them, softens the cellulose and releases the mineral salts, which pass off into the water.

Only Fibers Left

If we "drain" our vegetables in the common manner we throw away this three quarts of water in which are dissolved the most valuable constituents of any fruit or vegetable. What we have left is a residue of starch with the cellulose fibers. It is true that the fibers serve as "brooms" to the system as a scouring soap of nature, and the starch represents a certain amount of definite food material.

But the salts, the acids, the minerals, the phosphates, these are all wasted when we commit the great sin of throwing away water in which vegetables have boiled.

Use Of Vegetables

We can get the same amount of starch from other foods like grain, and the fibers of the vegetables are the least important part. The main function of the vegetable is to furnish to the body those chemical constituents which are particularly needed adequately to develop heat, other bones, and to purify the blood.

Now, this practice is not necessary. It is simply due to carelessness, haphazard methods of ignorant workers who never measure the amount of water on a vegetable and who would just as soon have two quarts left at the end of boiling as one pint. The proper way is to cook the vegetable in just sufficient water to keep it from burning, and to use this small quantity in some kind of sauce so as to conserve it. Others may utilize vegetable water in soups, as is commonly done abroad and as a basis for stock.

RASPBERRY VINEGAR

In making raspberry vinegar let your proportions be a pint and a half of fresh raspberries to every pint of vinegar; put these together in a stone jar and let them stand twenty-four hours; then strain and put the liquor back in the jar with one and half pints of fresh raspberries for twenty-four hours longer. Repeat the process for a third day, and drain without pressing through a jelly bag previously wet with vinegar, and add one pound of sugar for every pint of juice. Stir well, and when dissolved cover. Place the jar in a kettle of hot water and boil on hour, removing the scum as it rises. Bottle hot and seal the corks. When serving dilute with three parts of water.

Chicken a la King

This is a tempting dish and comes to your table from the famous Waldorf-Astoria hotel. Take the breast of a boiled chicken and cut it into small pieces. Place it in a saucepan together with green peppers, cut into dice, which have been cooked in butter. To this add double cream, salt and pepper to taste, and chopped truffle. Cook for five minutes. Then add the yolks of two eggs, a little butter and a little finely chopped tarragon.

Peach Bread Pudding

Soak a pint of fine bread crumbs in boiling water. Add half a cup of sugar, two well beaten eggs and a tablespoon of melted butter. Fill a buttered pudding dish with alternate layers of this bread mixture and sliced sweetened peaches, having a layer of bread on the top and bottom of the dish. Bake slowly for fifty minutes in a moderate oven and serve hot with sweetened cream.

Hot Sandwich

Cream a roll of snappy cheese; add a well beaten egg and season with a tablespoonful Worcestershire sauce, 1-4 teaspoon salt and 1-4 teaspoon mustard. Spread the mixture on slices of bread, cut about half an inch thick. Put a slice of bacon on each piece of bread and bake for a few moments in a hot oven until the bacon is done.

Stuffed Heart

Mix a cup and a half of bread crumbs, quarter of a pound of suet, chopped fine, a tablespoon each of minced parsley and sweet peppers, the grated rind and juice of half a lemon, salt and pepper, and a little nutmeg. Moisten with milk and stuff the heart. Bake until done, basting often.

New Turnips With Sauce

Peel and cut in small pieces. Boil in salted water, and when done, drain and pour over a sauce made by melting a tablespoon of butter, stirring in a tablespoon of flour, a cup and a half of milk and boiling until thick.

Raspberry Ice

After you have extracted the juice from a quart of raspberries, strain it and dissolve one pint of water in it, then add the juice of one lemon and a half a pint of water and freeze.

Watermelon Ice

Scoop out the pink of a very ripe melon, add a cup of sugar and freeze. Serve in the melon rind.

It is easier to criticize the small mistakes of others than it is not to make a few large ones yourself.

NATIONAL ANTHEMS COMPOSED TO ORDER

Will Australia get a national anthem out of this empire crisis? Who can say? Are national anthems ever written to order? We doubt it. If, like Topsy, they don't "just grow," there's something artificial and unsatisfactory about them, something like paper roses. Portugal, on the establishment of the republic, asked for a new national anthem, but we have not heard that she has got one to suit. Like poets, national anthems are born, not made.

The fact is, that it is not always the official national anthem which is the real one. For instance, "My Country, 'Tis of Thee," sung to our own "God Save" tune, is the official anthem of the United States, but it takes secondary place to "The Star Spangled Banner," "Yanke Doodle," "John Brown's Body," and, in the south, "Dixie Land." These were all anthems her from the heart in times of crisis.

Even the "Marseillaise," which is the official anthem of the French Republic, used to be anathema to the Government, but is an anthem of revolt, not of loyalty. It was a song of revolution. But now that a republic has ousted royalty it is shown in at the front door.

Really our own "God Save the King" was the merest accident. Who commissioned it? It simply happened. But, even so, it is not the best of our great national songs. That place is undoubtedly held by "Rule, Britannia!" Morover, that old Jacobite song, written to an exiled monarch, is really much better in every way than our official anthem—"Here's a Health Unto His Majesty."

It is surprising how seldom Scots sing the National Anthem. What do they sing when they foregather either at home or at the far ends of the earth? Why, "Auld Lang Syne," of course! That's the Scottish national anthem!

Led British In Middle East

GENERAL F. S. MAUDE

forferly on the Governor-General's staff at Ottawa, succeeded General Townshend as commander in campaign to conquer the Turks in the Tigris country for Britain.

OLDEST VOLUNTEER

Death of Major Gant on His 100th Birthday

By the death of Major John Castle Gant, at the age of 100, England has lost its oldest volunteer. He caught a chill on his birthday and died at his picturesque residence, Willowhyrst, Chiddingly, Sussex. He joined the volunteers at the age of forty-three, when fears of a French invasion resulted in the formation of the force, and he claimed to have provided the uniforms of the first with much material for pictorial satire. He was a great friend of Mr. T. Delane, the famous editor of The Times.

Born at Herne (Kent), he was the son of Lieut.-Colonel John Castle Gant, formerly Deputy-Governor of the Tower of London. He was educated for the army, but did not join the law, and became one of the best known solicitors in the City.

He served as a special constable during the Chartist riots. To temperate habits and plenty of outdoor exercise he attributed his long life. He followed the war news closely, and hoisted a flag in front of his house every morning when the papers contained good news.

GIRL PLOWED BETTER

Man Bowed to Superior "Finish" of Lincolnshire Maid

Here is an interesting result of war time exigencies in England: Miss Hilde Jackson, aged 19, of Tattershall Thorpe, defeated Mr. Tom Wilkinson, aged 61, of Dovecote Farm, Wainfleet, in a ploughing match for $50 a side on Mr. F. Bault's farm at Wainfleet, Lincolnshire. The test was on barley stubble in heavy ground. Each competitor had to plough half an acre, setting two ridges, and with furrow. The work of Miss Jackson, who has been ploughing since she was ten years old, was declared by the judge, Mr. Taylor, of Welton, to be more finished than that of her competitor.

Dying to a Ditty

How many thousands of British soldiers have gone to their death in Flanders and Gallipoli with a music hall song on their lips and in their ears, it was by sheer good luck that the song of the day chanced to be rather a charming one.—W. Archer.

There is little doubt in Africa that the adoption of the policy of consulting native opinion would result in an overwhelming vote being cast throughout what was formerly German Africa in favor of the British flag.

BABY'S SLEEP AND REST

The baby should sleep alone in its own crib, protected from flies.

Remove all clothing at bedtime and replace by clean, comfortable night clothes.

If the baby cries when it should be asleep, it is either sick, overfed, hungry or uncomfortable.

Constant jumping or jarring of the baby is likely to hurt its nerves and upset its digestion.

A very young baby during the first three months of its life must have from 16 to 20 hours' sleep out of the twenty-four.

Never rock the baby, use pacifiers or comforters to put the baby to sleep. Never let a baby suck a nipple unless he is getting food through it at the proper feeding time.

Never give a baby or children food purchased from pushcarts, hokey-pokey, ice cream wagons, etc. Give only the simplest prescribed foods.

See that the bedding, diaper and clothing are clean, smooth and unwrinkled; the room should be darkened while the baby sleeps, kept quiet and well ventilated. The windows should always be opened at the top at least six inches; in summer time wide open.

Stylish Top Coat

Blue and green checked plaid is cleverly manipulated in this smart top coat. The fullness is attractively confined by the narrow belt with its cartride trimming. Moleskin fur is introduced as trimming, thus lending a rich finishing touch.

Canteloupe Frappe

Select two large, ripe canteloupes, cut in halves and remove the pulp, and press through a sieve. Add one cup of powdered sugar and half a cup of orange juice. Soak a tablespoon of gelatine in a quarter of a cup of water, set over boiling water, and stir until dissolved. Then stir into this the canteloupe mixture, and when cold turn into a freezer and freeze slowly. Serve in sherbet glasses.

Raspberry Ice

Put two quarts raspberries through a colander and then squeeze through a cheesecloth bag. Boil 1 3-4 cups sugar and a quart water for 20 minutes; add the berry juice and 3 tablespoonfuls of lemon juice. Freeze in three parts ice to one part salt. Either black or red berries may be used for wine-colored or rose-colored ice.

To Clean Silver Lace

Silver lace may be cleaned by putting it into a linen bag and boiling it in soap water. Rinse in clear cold water. Apply warm alcohol to tarnished places. Remember to be careful with alcohol, for it take fire readily. Set in dish of boiling water to warm it.

To Rid a Room of Flies

Put a few pieces of charcoal on a shovel and light it; let it burn till red, then pour over it a few drops of carbolic acid. Wave this around the room a few times and see the flies disappear instantly.

Mock Dutch Birds

Cut a thin slice of veal cutlet in oblongs. On each place put a small strip of salt pork, grated onion, and chopped parsley. Add pepper. Roll each piece up and tie with a string. Roast in a slow oven.

Potato Souffle

Boil and mash white potatoes to make two cups. Add a well-beaten egg, three tablespoons of milk, a piece of butter and pepper and salt. Turn into a baking dish and bake brown.

Baked Bread and Cheese

Place in a baking dish slices of bread, then a layer of cheese, season, and repeat until the dish is full. Pour in enough milk to moisten the bread and nearly cover all. Cover and bake half an hour. Uncover and brown.

Creamed Cucumbers

Peel three good-sized cucumbers, cut in thin slices, cover with boiling water, let simmer until tender, and heat thoroughly, and serve on toasted bread.

How to Control The Garden Insects

The Entomological branch of the Dominion Department of Agriculture will issue early in May Circular No. 9 on "Common Garden Insects and their Control." This publication includes an account of the more important insect pests of the vegetable and flower garden. It has been prepared for wide distribution at this time when everywhere throughout Canada efforts are being earnestly made to increase the production of vegetable food, etc., in back yards, vacant lots and other areas near cities and towns. The remedial measures for controlling the common destructive species and also formulas for the making of the chief insecticides are given.

Gardeners will find this publication a most useful means for solving many troubles that arise. Application for this Entomological Circular No. 9 should be made to the chief of the publications branch, Department of Agriculture, Ottawa.

In Cooling Draughts

Everybody in the smoking-room was interested in the reminiscences of the returned explorer, who was getting rather bored with their neverending questions.

"I suppose, sir, you are quite indifferent to heat and cold?" asked one little man who had been busy questioning the traveller most of the evening.

"Can't say I mind it much," answered the other.

"Heat must be very trying, all the same," persisted the cross-examiner.

"It is sometimes. I remember once being on a steamer in the Red Sea, when I did find the heat a bit too much. In fact, it was so hot that we were obliged to go down to the stokehole to get cool!"

And then, one by one, they all went home.

Why Walk?

Toots was tearing over the roads in his new car—the first he ever possessed—feeling thoroughly pleased with himself and quite content with the world in general. Especially was he delighted with the latest thing in motor horns that was attached to his car, one blast of which was guaranteed to freeze the brain of a pedestrian.

But the man in the middle of the road, about a hundred yards ahead, was not to be frightened.

"Hi!" he shouted, waving his arms. "Pull up! You're exceeding the speed limit!"

"Nonsense!" retorted Jones; but he pulled up all the same.

"May be nonsense, and it may be not," said the man. "Anyway, you can explain that to the Mudford police."

Mudford was seven miles out of the road that Toots wished to travel, but, secure in his innocence, he drove there in silence.

When they reached the police station the stranger stepped out, and said:

"Well, I hope the police will believe you. It wouldn't be any good me coming with you, as I'm not known in those parts. Good morning!"

A Real Compliment

An Irish policeman, having got into trouble with his authorities, sought the aid of a solicitor in a forthcoming inquiry. He was quite candid and confessed "he was in a purty bad fix."

"I suppose I should take that as a compliment," remarked the man of law.

Policeman: "Tubeshure, sorr; there's not a gintleman O'Ye place before phwin Oi'm nonsense wid a face as serious as an undertakir."

The Bad, Bad Man

"That man has wrecked many a home."

"One of those smooth-tongued rascals, I suppose?"

"No, he's a house-mover."

"What's the trouble, John?"

"Why, sir, here's a note from Mr. Mahistick, in which he tells me that he is off on a little trip, and he wants me to send his drawing materials along."

"Well, and isn't that plain enough?"

"Hardly, sir. I don't know whether to send his paints and brushes or only a corkscrew."

Approximately 90,000 tons of Allied shipping which has been tied up in the Gulf of Bothnia since the beginning of the war will be released as the result of an agreement just perfected between Great Britain and Sweden.

* * *

As next Thursday, Empire Day, is a Dominion holiday, all places of business will be closed for the day. Do your shopping Wednesday afternoon and evening.

* * *

Plowmen are busy with their teams these days getting the vacant lots in shape for gardening. Present indications are that Redcliff will do its share along this line this year.

* * *

MAID WANTED—Girl for General housework; good wages paid. Mrs. R. R. Stoner.

* * *

It is a pleasure to select your garden seeds at Blundell's. Their stock is arranged so conveniently. **

* * *

Word has been received by friends here that Lieut. Woodcock and Lieut. Nicholson, both Redcliff young men now in France, had been recommended as officers to be sent to the United States as instructors. They were both born under the Stars and Stripes.

* * *

Mrs. Ed Short received a letter this week from her husband who is now in the trenches. The letter was written on April 13th and at that time Ed. was all right. He states that T. Collins, who enlisted from here and was working at the Glass plant at the time, was wounded in the cheek.

* * *

Warren Higgins has taken over the management of the Amuseu theatre. He is having it overhauled and says it is his intention to make this popular play house a credit to Redcliff. He is now arranging for the best service it is possible to secure and expects to be able to give his patrons the worth of their money every show night.

* * *

The Glass plant here has just completed the construction of a large reservoir to be used in connection with the plant. It is built of solid concrete and in the centre of it is a large fountain with five sprays. This is used for cooling the water and putting it through a chemical process before going through the plant.

* * *

After the regular meeting of the Odd Fellows lodge last evening the members of the Rebekah lodge sprung quite a surprise on their brothers. The ladies had arranged for a social evening and invited the Odd Fellows to join with them. Cards and games were played after which refreshments were served. On the whole a most enjoyable evening was spent.

* * *

At the Baptist church service last Sunday evening the pastor, Rev. F. T. White surprised the congregation when he announced the result of the canvas for funds for the new church which the congregation contemplate building here in the near future. While the result is encouraging the committee is anxious to get all contributions in as soon as possible, so that they may be in a position to commence operations early this summer. Contributions will be received at the Imperial bank or pastor or any member of the building committee.

* * *

The United States Federal Shipping board has announced that it has purchased from American owners seven Austrian merchantmen held in American ports, tialing 52,661 tons, for $6,779,006. The price is about half the prevailing price for ships. The vessels will be repaired within a few months and placed in the war emergency trade by the board.

CHURCH NOTICES

FIRST BAPTIST CHURCH.
Reid's Hall.

UNION BIBLE CLASS.
The class is undenomination l and meets in the Presbyterian church at 3.30 Sabbath afternoon. Topic: "The Holy Spirit and His Work." John 15:26 to 16:14. Is the Holy Spirit a person? In what ways is He the greatest helper a Christian has?

Chancellor Refuses To Discuss Plans

In one of the most vigorous and plain spoken speeches he has yet made before the reichstag since the outbreak of the war, the imperial German chancellor bluntly refused to enter into a discussion of Germany's war aims, as demanded by interpellations by the Conservatives and Socialists. Dr. von Bethmann-Hollweg asserted that these called for the government's specific peace program, the announcement of which would at the present time not only be premature, but which it would be difficult to formulate, and also of no practical service to the nation in the present situation.

British Are Gaining Gronnd in Asia

Both in Mesopottomia and Macedonia successes for the Allies are recorded. In the latter theatre the British in the Lake Doiran region have captured 5,000 yards of enemy trenches to a depth of 500 yards, and in the Struma river sector another front of trenchs of 3,000 yards.

HUNS DEPORTING BELGIANS.

Information officially received by the Belgian government is to the effect that all males between ages of 15 and 65 in the province of Luxemburg have been deported for work in France and Germany, in the environs of the frontiers. The instructions say that the burgomaster, preacher and notary in each commune may remain there.

A census of women has already been taken and the results divided into three categories.

Old man—Is that your mamma yonder with the beautiful set of furs?

Willie—Yes, sir.

Old Man—Well, do you know what poor animal it is that has to suffer in order that your mamma might have the furs with which she adorns herself so proudly?

Willie—Yes, sir; my papa.

A Gloomy Prospect

George, who lives in London, happened to meet the vicar of his native parish and eagerly asked after some of his old acquaintances.

"And old Mr. Jones?" he asked. "Have you seen him lately?"

The vicar shook his head. "I shall never see him again," he answered, slowly. "Mr. Jones has gone to Heaven."

BIRTHS.

TURNER—In Redcliff, on Monday, May 14th, 1917, to Mr. and Mrs. Jos. Turner, a son.

INTERESTING MAXIAMS NOW IN CIRCULATION.

Maxims given wide distribution by the food economy department of the food ministry in London include the following:

"Rich people who make their dinner of lobster salad are good patriots. The rich man, who eats neck of mutton and bread is not.

"The woman who wastes a crust, wastes a bullet.

"EEat slowly and you need eat less. Five people out of 10 people are digging their graves with their teeth.

"The dustbin swallows the food of millions.

The United States government will issue a daily newspaper giving news and announcements of all departments relating to war preparations. The publication, known as "The Official Bulletin," will be issued under the direction of the committee on public information.

If the recommendations of the house committee are adopted by congress, single men will be hit hard. The bill as presented to the house lowers the exemption to $1,000 for single men and $2,000 for married men, and increases the rate to 4 per cent instead of 2.
